PROJECTS

AI Legal Advisor

- Engineered an AI-powered platform to demystify the Indian Constitution, enabling citizens to understand their legal rights through a conversational and accessible interface.
- Designed an intuitive, user-centric UI that streamlines navigation of complex legal information, significantly improving public awareness of the justice system.

Student Performance Predictor

- Architected a Machine Learning model using Python and Scikit-learn to accurately forecast student academic outcomes, empowering educators with data-driven insights.
- Implemented robust data preprocessing pipelines — handling missing values, feature engineering, and normalization — resulting in measurably improved prediction accuracy.
